

AI Enabled Smart Pharma Rack

Prevention. Protection. Recovery.

RACKIQ is an intelligent rack management solution designed to optimize storage systems, improve operational efficiency, and enable real-time visibility across rack infrastructure. The solution integrates smart monitoring, automation, and analytics to ensure enhanced performance, security, and scalability.

5 Powerful Capabilities

Fast Dispensing

Frugal, LED based system that reads the prescription, switches on lights, and guides user to location, enabling faster and error-free dispensing with 75% reduction in wait times.

AI Driven JIT Inventory Management

Warehouse integration, vendor order automation, and near-expiry control delivering structured inventory management with 50% reduction in manual effort.

Checks Drug Reactions

Drug-drug reactions validated against prescription & EHR, ensuring safer & compliant dispensing with 95% reduction in prescription errors.

User Education

App and QR coded invoice providing usage & expiry information, improving adherence and therapeutic effectiveness with 20%++ improvement in effectiveness.

Vigilant Watch & Recall Management

Audit automation, self-check mechanisms, and secure offline access enabling controlled audit and compliance management with 40% reduction in stock loss.

Automation-led dispensing.

Measurable control on stock movement.

Structured pharmacy operations.
